ABOUT ME

I am a Web Developer with a passion for Front End development.

Ever since I wrote my first Javascript game of Snake I have been fascinated with programming and haven't let a day go by without actively learning something new about creating high quality web software.

Below you can find a few of my recent Projects that showcase my skills and background in Web Development.

EXPERIENCE

PORTFOLIO

I love front end development, writing JS, HTML and CSS but am actively expanding my skills to mastery of back end languages too.

MERN STACK EXPENSES TRACKER

Since learning React I've been learning NodeJS, Express and MongoDB. This is a little project to track expenses with a fully built backend.

WORDPRESS WEB DESIGN

I made my first website using Wordpress in 2010. Then I learnt how to customise my own sites with HTML and CSS and have been making WP websites for private clients, friends and businesses since then.
